## **Chairman's Statement**

## 主席報告書

Dear Shareholders,

In 2024, with the sluggish global macro-economy recovery and the continued pressure on the domestic economy in the course of structural adjustment, the environmental protection industry faced the multiple challenges of fluctuating market demand, intensified competition and rising costs. Against this backdrop, the Group has always been committed to the mission of "meeting our customers' full range demands for ecological and environmental protection", adhered to the philosophy of "service builds trust, and professionalism creates value", and relied on the core driving force of continuous innovation, with a view to deepening the strategic layout of the integration of the four business segments, namely "gas, water, solid waste and dual-carbon new energy+", to achieve stable operation amidst adversity. Our operating revenue for the year amounted to RMB2,151 million, with a gross profit of RMB435 million and a net profit of RMB240 million, reflecting a stable and improving performance. Despite the industry has generally been under pressure, the Group has consolidated its foundation for highquality development with prudent operation.

## 尊敬的各位股東:

2024年,全球宏觀經濟復甦乏力,國內經濟在結構性調整中持續承壓,環保行業面臨市場需求波動、競爭加劇與成本攀升的多重考驗。在此背景下,本集團始終以「滿足客戶全方位的生態綠色環保需求」為使命,堅守「服務建立信任、專力造價值」的理念,依託持續創新的核心驅動力。深化「氣+水+固+雙碳新能源+」四位一體戰略佈局,在逆境中實現穩健經營。全年營業收入民幣21.51億元,毛利潤人民幣4.35億元,淨利潤人民幣2.40億元,業績表現穩中有進,在行業整體承壓的形勢下,本集團以穩健經營夯實高質量發展根基。

## Chairman's Statement (Continued)

主席報告書(續)

In 2024, the Group's core businesses developed steadily and its strategic transformation achieved preliminary results. In the field of flue gas treatment, in spite of the shrinking market capacity, the Group maintained its competitiveness through technological upgrading and refined operation of existing projects. The "energy-saving SCR technology for cement kiln" independently researched and developed by the Group was selected into "Recommended Catalogue of Green and Low-carbon Advanced Technology in Beijing (2024 Edition)", becoming a technical benchmark for the lowcarbon transformation of the industry, and helping customers reduce costs and increase efficiency. The Group has vigorously developed the industrial water treatment business and successfully penetrated into various industry sectors such as electrolytic aluminum, pharmaceutical, papermaking, zero-emission coking salt extraction and titanium dioxide. and steadily improved the profitability of the business through the optimized solution of special technologies such as zero-emission coking salt extraction, thus providing important support for the steady growth of the Group. In terms of hazardous and solid waste treatment/disposal segment, the Group accelerated the application of resource recycling technology through the coordinated development path of harmless waste and waste reduction, and promoted the intensified transformation of the business model from traditional terminal disposal to the circular economy of "frontend waste reduction - process cleaning - terminal recycling". Dual-carbon new energy+ business achieved a milestone in 2024: Our first self-developed industrial and commercial distributed photovoltaic project (the Foshan Project) has commenced construction, and the Shouyang Photovoltaic Project, our first project won through public bidding, was successfully connected to the electric grid, marking the gradual progress of the new energy business towards largescale implementation. The Group has focused on the markets of the photovoltaic power generation, energy storage system integration and resource recycling, and gradually released the synergy from its core business of environmental governance, thus laying a foundation for its future growth.

#### 1. 行業概覽

2024年是全面推進美麗中國建設的重要一年,這一年黨的二十屆三中全會通過《中共中央關於進一步全面深化改革推進中國式現代化的決定》,強調要「聚焦建設美麗中國」,並在「深化生態文明體制改革」中提出完善生態文明制度體系,協同推進降碳、減污、擴綠、增長,以積極應對氣候變化,提升綠色發展領域治理體系和治理能力現代化水平,開啟全面推進美麗中國建設的新篇章。

2024 is also a critical year for China to achieve the goals of the "14th Five-Year" Plan. The state continues to deepen the "dual-carbon" strategy and promote the construction of a green, low-carbon and circular economic system. In the policy level, efforts are focused on pollution prevention and control, efficient resource utilization and new energy transformation. As an important support for high-quality development, the environmental protection industry is ushering in a period of benefiting from the policy advantage.

Since 2024, the state has intensively introduced a series of ultra-low emission transformation policies for key industries, bringing broad development opportunities for flue gas treatment and environmental protection enterprises. In January 2024, five ministries and commissions, including the Ministry of Ecology and Environment, jointly issued the "Opinions on Promoting the Implementation of Ultra-low Emissions in the Cement Industry" and the "Opinions on Promoting the Implementation of Ultra-Low Emissions in the Coking Industry", requiring that by the end of 2025, 50% of cement clinker production capacity and 60% of coking capacity in key areas will complete ultra-low emission transformation. In June 2024, the National Development and Reform Commission and the National Energy Administration issued the "Low-Carbon Transformation and Construction Action Plan for Coal-fired Electricity (2024-2027)", proposing a goal of reducing carbon emissions of coal-fired power units by about 50% by 2027 compared with 2023. In the same month, the Ministry of Ecology and Environment publicly solicited the "Opinions on Promoting the Implementation of Ultra-Low Emissions from Coal-Fired Boilers with High Quality (Draft for Comment)" to promote ultralow emission transformation of coal-fired boilers and self-provided power plants. In November 2024, the Ministry of Industry and Information Technology issued the "Standardized Conditions for the Steel Industry (Revised in 2024) (Draft for Comment)", requiring steel companies to complete the entire process of ultralow emission transformation from 2026. The gradual implementation of these policies not only provides clear technical guidance for flue gas treatment and 2024年是中國實現「十四五」規劃目標的關鍵年,國家持續深化「雙碳」戰略,推動綠色低碳循環發展經濟體系建設。政策層面聚焦污染防治攻堅、資源高效利用和新能源轉型,環保產業作為高質量發展的重要支撐,迎來政策紅利釋放期。

2024年以來,國家密集出台了一系列針 對重點行業的超低排放改造政策,為煙氣 治理環保企業帶來了廣闊的發展機遇。 2024年1月,生熊環境部等五部委聯合印 發《關於推進實施水泥行業超低排放的意 見》和《關於推進實施焦化行業超低排放 的意見》,要求到2025年底前,重點區域 50%的水泥熟料產能和60%的焦化產能完 成超低排放改造。2024年6月,國家發展 改革委和國家能源局發佈《煤電低碳化改 造建設行動方案(2024-2027年)》,提出 到2027年煤電機組度電碳排放較2023年 降低50%左右的目標。同月,生態環境部 公開徵求《關於高質量推進實施燃煤鍋爐 超低排放的意見(徵求意見稿)》,推動燃 煤鍋爐和自備電廠的超低排放改造。2024 年11月,工信部發佈《鋼鐵行業規範條件 (2024年修訂)(徵求意見稿)》,要求鋼鐵 企業2026年起完成全流程超低排放改造。

environmental protection companies, but also greatly expands the market space to facilitate the growth of orders for environmental protection companies, which are conducive to the high-quality development of the industry.

In July 2024, the National Development and Reform Commission, the Ministry of Water Resources, the Ministry of Industry and Information Technology, the Ministry of Housing and Urban-Rural Development and the Ministry of Agriculture and Rural Affairs jointly issued the "Guiding Opinions on Accelerating the Development of Water-Saving Industry". The opinions propose that by 2027, the market scale of the watersaving industry will reach RMB1 trillion, and specialized and new "Little Giant" enterprises will be cultivated to form a new development pattern of the water-saving industry. At the same time, the opinions emphasize rigid constraints on water resources, strictly control high water-consuming projects, strengthen watersaving management, and use central budget investment and water conservancy development funds to support water pollution control and water-saving technology innovation. As such, the industry will usher in a broad market space and technological innovation needs, thus promoting industrial upgrading and the application of highly efficient water-saving technologies.

這些政策的逐步落地,不僅為煙氣治理環 保企業提供了明確的技術指導方向,還大 幅拓展了市場空間,推動環保企業訂單增 長,助力行業實現高質量發展。

2024年7月,國家發展改革委、水利部、工業和信息化部、住房城鄉建設部及農業農村部聯合印發《關於加快發展節水產業的指導意見》。該意見提出,到2027年,節水產業規模將達人民幣萬億,並培育發展,並培育所以下之人。 新格局。同時,該意見強調水資源剛性的東,嚴控高耗水項目,強化節水管理,並利用中央預算內投資和財政水利發展與約束,嚴控高耗水項間和財政水利發展業將與來廣闊市場空間和技術創新需求,推動產業升級和高效節水技術應用。

In September 2024, the General Office of the Ministry of Industry and Information Technology issued the "Guidelines for the Construction of Photovoltaic Industry Standard System (2024 Edition)", which clearly proposed to standardize the technical requirements of photovoltaic and storage systems combining the technologies of both photovoltaics and energy storage, including standards for the design, acceptance, operation and maintenance and evaluation of photovoltaic and storage systems, as well as standardize the technical requirements of electrical components used in photovoltaic and storage systems combining the technologies of both photovoltaics and energy storage, including standards for photovoltaic and storage integrated machines, charge and discharge controllers, etc. The clarification of these standards will promote the technical normalization and standardization of photovoltaic and storage systems, so as to provide a solid foundation for the integrated development of photovoltaics and energy storage, help improve the reliability and safety of the systems, and enhance the market's confidence in photovoltaic and storage systems. At the same time, standardized construction is also conducive to reducing system costs, improving market competitiveness, promoting the large-scale development of the photovoltaic and new energy industries, and promoting the industry's transformation from "low-cost expansion" to "highquality development".

2024年9月,工業和信息化部辦公廳發 佈《光伏產業標準體系建設指南(2024 版)》,文件明確提出,規範光伏與儲能結 合的光儲系統的技術要求,包括光儲系統 設計、驗收、運維、評價等標準;及規範 光伏與儲能結合的光儲系統所用的電氣部 件的技術要求,包括光儲一體機、充放電 控制器等標準。這些標準的明確,將推動 光儲系統的技術規範化和標準化,為光伏 與儲能的融合發展提供堅實基礎,有助於 提升系統的可靠性和安全性,增強市場對 光儲系統的信心。同時,標準化建設也有 利於降低系統成本,提高市場競爭力,促 進光伏及新能源行業的規模化發展,推動 行業從「低成本擴張」向「高質量發展」轉 型。

In November 2024, five departments, including the Ministry of Ecology and Environment, revised and issued the "National List of Hazardous Wastes (2025 Edition)". The revision mainly focused on various aspects such as the classification management of hazardous wastes after identification, accurate identification of hazardous wastes and exemption management of hazardous wastes. The promulgation of the "National List of Hazardous Wastes (2025 Edition)" will help enterprises improve management efficiency, adapt to the development of emerging industries and technologies, ensure environmental safety, improve identification and classification accuracy, promote technological innovation and industrial upgrading, and promote the healthy development of the market.

2024年11月,生態環境部等五部門修訂發佈了《國家危險廢物名錄(2025年版)》,本次修訂主要集中在鑑別後危險廢物的歸類管理、精準識別危險廢物、危險廢物豁免管理等方面。《國家危險廢物名錄(2025年版)》的發佈,有助於企業提升管理效率、適應新興工業和技術發展、保障環境安全、提升識別和分類準確性、推動技術創新和產業升級以及促進市場健康發展。

# Risks on environmental protection and pollution control policies

The Group provides substantially all of its environmental protection services to customers in the PRC. and the development of its businesses is greatly dependent on the pollution preventive policies of the PRC. Environmental protection industry is one of the major industries that benefit from the constant support of the PRC government. The demand for the Group's environmental protection services and the revenue generated from are directly linked with the environmental protection requirements imposed on the current and potential customers of the Group. However, there can be no assurance that the specific favourable policies which are currently available will continue to exist. In addition, these policies and incentives may attract additional new market entrants to enter the market, and may also encourage the market entrants to provide other products or services with greater pollution control effects than the products and services of the Group. Therefore, there is no assurance that the Group will directly benefit from the changed industry policies. However, as the leader of the independent comprehensive flue gas treatment service provider in China, the Group will seize market opportunities to further cover the entire industrial chain of the flue gas treatment industry and explore potential markets. At the same time, the Group will actively develop new markets in non-electricity industries such as steel, petrochemicals and electrolytic aluminum, and develop environmental protection businesses, including water treatment and hazardous and solid waste treatment/ disposal, and dual carbon new energy+ business, with a view to achieving the sustainable development of the Group's business.

Operation, Inspection and Maintenance Project of Flue Gas Desulfurization, Wet Electrostatic Ash Removal, Ash and Slag Removal Systems of #1-#8 (6×350MW+2×600MW) Units of Yangcheng Power Generation Company.

# 陽城發電公司#1-#8(6×350MW+2×600MW)機組煙氣脱硫,濕電除塵,除灰、除渣系統運行檢修維護項目。

All units adopt the limestone-gypsum wet desulfurization process and are equipped with a "one furnace and one tower" desulfurization device. The designed  $SO_2$  removal rate of the desulfurization device of the Phase I Project is not less than 99.3%; the flue gas volume of the Phase II unit is significantly higher than that of the Phase I unit due to its larger unit capacity (600MW). All units meet strict requirements on  $SO_2$  emission control.

全部機組採用石灰石 — 石膏濕法脱硫工藝,配置「一爐一塔」 脱硫裝置。一期項目脱硫裝置設計 $SO_2$  脱除率不小於99.3%;二期機組因單機容量更大(600MW),煙氣量顯著高於一期機組。所有機組均滿足嚴格的 $SO_2$ 排放控制要求。

During the more than ten years of operation of the project, the equipment was in sound condition and all indicators met the environmental emission requirements. The long-term stable operation of this project not only indicates the solid operational level of the Group in thermal power flue gas treatment, but also reflects the Group's advanced execution and management level in subsequent operation and maintenance.

該項目十餘年運行期內設備狀況良好,各項指標均達到環保排放要求。該項目長久的穩定運營不光標誌着本集團在火電煙氣治理方面紥實的運營水平,同時更是體現出本集團在後期運維方面先進的執行及管理水平。

#### 3.1.3. Water treatment

The Group is committed to assisting industrial enterprises in complying with increasingly stringent discharge regulations and improving the quality of the water environment. Accordingly, the Group's service business has gradually expanded to industrial wastewater treatment.

During the Reporting Period, the average discharge intensity of the main pollutants discharged from the Group's Lubao Industrial Park Wastewater Treatment Project after treatment are as follows:

# 3.1.3. 水處理

本集團致力協助工業企業遵守日益嚴格的 排放規則,改善水環境的質量。因此,本 集團的服務業務已逐步擴大到包括工業廢 水處理。

於報告期內,本集團的潞寶工業園區污水 處理項目經過處理後的主要污染物排放物 的平均排放濃度如下:

#### **Environmental indicators of**

sewage discharge	Unit	2023	2024
污水排放物環境指標	單位	2023年	2024年
Ammonia nitrogen	mg/litre	1.44	3.27 (Note 3) (附註3)
氨氮	毫克/升

Chemical oxygen demand	mg/litre	65.09	64.78
化學需氧量	毫克/升		
pH value	_	7.49	7.53

Note 3: The increase in the ammonia nitrogen emission index in 2024 is due to the increase in the amount of water treated by the project and the high level of water pollution, but the emission index is still far below the national emission standard of 25 mg/ litre.

附註3:2024年度氨氮排放指標上升是由於項目所接收 水處理量增加和水污染程度高有關,但該排放 指標仍遠低於國家排放標準25mg/升。

#### 3.1.4. Waste treatment

The major non-hazardous waste generated by the Group is desulfurized gypsum and paper produced in the flue gas desulfurization process, and the hazardous waste generated is mainly waste catalyst produced in the flue gas denitrification process. We preferentially sell desulfurized gypsum to users who have the utilization ability to reuse. For the desulfurized gypsum that cannot be reused, it is used in the construction of storage and disposal sites that are constructed in accordance with the "Standard for Pollution Control of General Industrial Solid Waste in Storage and Disposal Sites".

As mentioned above, the Group strictly abides by the codes of the state and relevant agencies on the use of energy. Meanwhile, we have formulated and implemented the Energy Saving and Consumption Reduction Management System, with the primary goal of minimizing energy consumption by establishing and improving energy-saving systems, upgrading existing equipment and promoting low-carbon life.

The Group has made energy-saving adjustments to the demister, and modified the cyclone blades on the intake side of the condensing and wet film layer of highefficient demister of absorbing column; transformed some circulating pump motors into permanent magnet motors; carried out energy-saving adjustment to lowload and low-sulfur oxidation blowers; and applied the addition of synergists to projects, so as to further enhance the operating efficiency of power units and reduce the carbon footprint.

如上文所提及,本集團嚴格遵守國家及相關機構在能源使用方面的守則。同時,我們制定並實施《節能降耗管理制度》,通過設立完善節能系統、升級原有設備、提倡低碳生活等,以盡量減少能源消耗為首要目標。

本集團對除霧器進行了節能調整,對吸收 塔高效除霧器冷凝濕膜層進氣側的旋風葉 片進行了改造;將部分循環泵電機改造為 永磁電機;對低負荷、低硫氧化鼓風機進 行了節能調整;在項目中增加增效劑,以 進一步提高機組運行效率,減少碳足跡。

In addition, the 12.57MWp Distributed Photovoltaic Power Generation Project of Danzao Shihai Steel Logistics Base Co., Ltd. in Foshan, which was invested. constructed and operated by the Group, adopts the EMC energy management contract model utilizing approximately 87,000 square meters of factory roofs within the Danzao Shihai Steel Logistics Base Park in Foshan. According to the relevant filing, the construction of the project is divided into three phases: the installed capacity of the 1st phase is 1,869.12KWp, adopting the operation mode of "power generated for self-use and surplus power supplied to the power grid"; the installed capacities of the 2nd and 3rd phases are 4,973.11KWp and 5,731.26KWp respectively. both adopting the operation mode of "fully supplied to the power grid". The total installed capacity of the project is 12.57MWp, using a total of 21,311 pieces of 590Wp type n high-performance monocrystalline silicon photovoltaic modules. The project operation period is 25 years, with an estimated annual power generation of approximately 12.57 million kWh, and an average annual reduction in carbon dioxide emissions of approximately 10,320 tons (which are calculated based on the carbon dioxide emission from thermal power generation in the national power units of approximately 821 grams/kWh as stated in the Annual Development Report on China's Power Industry in 2024 released by the China Electricity Council). After the project is completed and connected to the power grid, it can not only meet the Company's own electricity needs, but also transmit excess electricity to the power grid, thus realizing full utilization of resources and contributing to the Company's green development.

此外,本集團投資建設運營的佛山市丹灶 世海鋼材物流基地有限公司12.57MWp分 佈式光伏發電項目,利用佛山市丹灶世 海鋼材物流基地園區內廠房屋頂約8.7萬 平方米,採用EMC能源管理合同模式。 項目分3期備案建設:一期裝機容量為 1,869.12KWp,採用「自發自用、餘電 上網]運營模式;二、三期裝機容量分為 4,973.11KWp及5,731.26KWp,均採用 「全額上網」運營模式。項目合計裝機容量 12.57MWp, 共採用21,311塊590Wp n 型高性能單晶硅光伏組件。項目運營期為 25年,預計年均發電量約為1,257萬千瓦 時,年均減少二氧化碳排放約10.320噸 (根據中國電力企業聯合會發佈《中國電 力行業年度發展報告2024》中「2023年, 全國單位火電發電量二氧化碳排放約821 克/千瓦時」折算)。項目建成並網發電後 既可以滿足企業自身的用電需求,還能夠 將多餘電力輸送至電網,實現資源的充分 利用,為企業的綠色發展貢獻力量。

# Climate-related opportunities 氣候相關機遇

expose the Group to various climate-related risks and negative financial impacts, but may also create climate-related opportunities with positive or favorable outcomes in the transition process to carbon neutralization.

 氣候變化可能使本集團面 臨各種與氣候相關的風險 和負面財務影響,但也可 能在向淨零轉型的過程中 創造與氣候相關的機遇, 產生積極或有利結果。

Regarding the objective conditions of the Group's operations and the external environment that it may encounter in the future, we have evaluated the climate-related risks that the Company may face in the future based on the Shared Socio-Economic Pathway (SSP) assumptions adopted by the Intergovernmental Panel on Climate Change (IPCC). We have adopted the SSP1-2.6 (strict pathway) and SSP5-8.5 (high emission pathway) for climate scenario analysis.

Shared Socio-Economic Pathways (SSP) are scenarios developed by the Intergovernmental Panel on Climate Change (IPCC) that focus on socio-economic impacts, and provide narrative depictions of alternative futures regarding different socio-economic challenges arising from adaptation and mitigation measures.

- SSP1-2.6: Low greenhouse gas emissions scenario, in which social, economic and technological trends will significantly deviate from past patterns, and relatively aggressive emission reduction measures will be introduced in the future. The rise in the global average temperature is limited to 1.5°C, and carbon dioxide emissions will fall to net zero level around 2050 or later, with varying degrees of net negative carbon dioxide emissions occurring subsequently.
- SSP5-8.5: Very high greenhouse gas emissions scenario, in which the rapid social, economic and technological development are based on an energy-intensive and fossil fuel-heavy lifestyle. The global average temperature will rise sharply by 4°C, and carbon dioxide emissions will be doubled around 2100 and 2050 respectively.

對於本集團運營的客觀情況以及可能在未來遇到的外部環境,我們根據政府間氣候變化專門委員會(IPCC)採用的共享社會經濟路徑(SSP)假設對本公司未來可能面臨的氣候相關風險進行評估。我們選擇了SSP1-2.6(嚴格路徑)和SSP5-8.5(高排放路徑)路徑開展氣候情景分析。

共享社會經濟路徑(SSP)是由政府間氣候變化專門委員會(IPCC)制定的情景,專注於社會經濟影響,就適應及減緩措拖引致的不同社會經濟挑戰,提供替代未來的敘述性描繪。

- SSP1-2.6:低溫室氣體排放情景,當中社會、經濟和技術趨勢會明顯偏離過往的模式,而未來引入相對進取的減排措施。全球平均氣溫上升限制在1.5°C,二氧化碳排放量分別在2050年左右或之後降至零淨值,並在隨後出現不同程度的二氧化碳淨負排放。
- SSP5-8.5:非常高溫室氣體排放情景,當中社會、經濟和技術的高速發展建基於高耗能、倚重化石燃料的生活方式。全球平均氣溫急劇上升4°C,二氧化碳排放量分別約在2100年及2050年增至現時的兩倍。

Considering that the concession periods of most projects are ranged from approximately 20 to 30 years, we focus our scenario analysis on the significant physical risks of climate change exposed to the Group in 2030 and 2050, as well as the risks and opportunities arising from policy and regulatory changes derived by low-carbon related economic transition globally. Our climate risk assessment starts from the two dimensions of physical risks and transition risks, refers to relevant document research such as national and industrial policies<sup>(Note6)</sup> and combines the Group's own business conditions, so as to examine different business segments, including flue gas treatment, water treatment, hazardous and solid waste treatment/disposal and dual carbon new energy<sup>+</sup>.

考慮到大多數項目的特許經營年期約介乎20至30年之間,我們將情景分析的重點放在2030年和2050年氣候變化對本集團的重大實體風險影響,以及全球追求低碳經濟轉型所帶來的政策和監管變化所催生的風險和機遇。我們的氣候風險評估從實體風險和轉型風險兩個維度出發,參考國家、產業政策等相關文獻研究(附註6),並結合本集團自身業務情況,審視不同業務範疇,包括煙氣治理、水處理、危固廢處理處置和雙碳新能源。

Based on the nature of our business and the measures we have taken, we believe that the level of actual impact of climate and transition risks on our business is relatively low as a whole. Due to our relatively short construction periods and the small proportion of projects for which we have asset rights, the exposure of our business to climate risks is limited. In addition, we have adopted effective safety management measures for equipment and employees to ensure their safety and health. In response to transition risks, we regularly disclose and monitor greenhouse gas emissions, and we have achieved outstanding environmental results in the field of flue gas treatment, which helps maintain our reputation and reduce the risks of financing cost.

根據我們的業務性質和已經採取的措施,我們認為整體而言,我們的業務受氣候和轉型風險的實際影響程度相對較低。由於我們的施工期相對較短,並且擁有資產權的項目佔比較少,我們的業務對氣候風險的暴露程度有限。此外,我們已經採取了有效的設備和員工安全管理措施,以確保他們的安全和健康。針對轉型風險,我們定期披露和監測溫室氣體排放,並且我們在煙氣治理領域取得了的環保成果,這有助於維護我們的聲譽並減少融資成本的風險。

Nevertheless, we remain concerned about the impact of climate change on our business. We recognize that climate and transition risks may evolve over time, so we will continue to assess and address these risks and identify related opportunities. We are committed to taking appropriate steps to reduce the impact of potential risks and proactively seize opportunities related to climate change and transformation trends. Through such efforts, we aim to ensure that our business can continue to grow steadily and remain competitive in an ever-changing environment.

儘管如此,我們仍然保持對氣候變化對業務的影響持續關注。我們意識到氣候風險和轉型風險可能隨着時間的推移而演變,因此我們將持續評估和應對這些風險,並尋找相關機遇。我們致力於採取適當的措施來減少潛在風險的影響,並積極抓住與氣候變化和轉型趨勢相關的機會。通過這樣的努力,我們的目標是確保我們的業務能夠持續穩定地發展,並在不斷變化的環境中保持競爭力。

#### **BASIS FOR OPINION**

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"). Our responsibilities under those standards are further described in the Auditor's responsibilities for the audit of the consolidated financial statements section of our report. We are independent of the Group in accordance with the HKICPA's Code of Ethics for Professional Accountants (the "Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

#### **KEY AUDIT MATTERS**

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

#### Revenue from construction contracts

We identified the revenue from construction contracts as a key audit matter due to the fact that the amount recognised was significant in the consolidated financial statements and the accounting treatments of which requires significant estimations made by the directors of the Company. Approximately 41% of the Group's total revenue for the year ended 31 December 2024 was related to construction contracts.

建造合約的收益

由於確認金額對該等綜合財務報表影響重大,且 其會計處理方式涉及 貴公司董事的重大會計估 計,因此我們將建造合約收益認定為關鍵審核事 項。截至2024年12月31日止年度本集團的總收 入中約41%與建造合約有關。

The Group's revenue from construction contracts is recognised over time based on the stage of completion of the contracts, which is determined as the proportion of the costs incurred relative to the estimated total costs to complete the contracts.

貴集團的建造合約收益乃根據合約完成階段確認,而合約完成階段按所產生的成本佔完成合約的估計總成本的比例釐定。

The directors of the Company estimate both of the profit margin and contract costs at the beginning for each contract, revise the estimations of both the profit margin and contract costs through regular reviews when the directors of the Company consider there are changes in the assumptions throughout the contract period.

貴公司董事在初始對各合約的毛利率及合約成本 作出估計,在 貴公司董事認為整個合約期間的 假設發生變化時,通過定期檢討來修訂有關毛利 率及合約成本的估計。

The accounting policies, significant estimates and related disclosures are included in notes 2.4, 3 and 5 to the consolidated financial statements.

會計政策、重要估計及相關披露載於綜合財務報 表附註2.4、3及5。

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

## RESPONSIBILITIES OF THE DIRECTORS FOR THE CONSOLIDATED FINANCIAL STATEMENTS

The directors of the Company are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with IFRSs issued by the IASB and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

## AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Our report is made solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

在根據香港核數準則進行審計的過程中,我們運 用專業判斷,保持專業懷疑態度。我們亦:

- 識別及評估由於欺詐或錯誤而導致綜合財務報表存在重大錯誤陳述的風險、設計及執行審計程序以應對該等風險,以及獲取充足和適當的審計憑證,作為我們的意見的基礎。由於欺詐可能涉及串謀、偽造、蓄意遺漏、虛假陳述或淩駕內部監控的情況,因此未能發現因欺詐而導致的重大錯誤陳述的風險。

- 評估董事所採用會計政策的恰當性及作出 會計估計和相關披露的合理性。

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Cheong Ming Yik.

#### 2. ACCOUNTING POLICIES

#### 2.1 BASIS OF PREPARATION

These financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRSs") (which include all IFRSs, International Accounting Standards ("IASs") and Interpretations) issued by the International Accounting Standards Board ("IASB") and the disclosure requirements of the Hong Kong Companies Ordinance. They have been prepared under the historical cost convention, except for debt investments, contingent consideration and equity investments which have been measured at fair value. These consolidated financial statements are presented in Renminbi ("RMB") and all values are rounded to the nearest thousand except when otherwise indicated.

#### **Basis of consolidation**

The consolidated financial statements include the financial statements of the Company and its subsidiaries (collectively referred to as the "**Group**") for the year ended 31 December 2024. A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by the Company. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee (i.e., existing rights that give the Group the current ability to direct the relevant activities of the investee).

# 2. ACCOUNTING POLICIES (Continued)

#### **2.1 BASIS OF PREPARATION** (Continued)

#### **Basis of consolidation** (Continued)

Generally, there is a presumption that a majority of voting rights results in control. When the Company has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) the contractual arrangement with the other vote holders of the investee:
- (b) rights arising from other contractual arrangements; and
- (c) the Group's voting rights and potential voting rights.

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. The results of subsidiaries are consolidated from the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

Profit or loss and each component of other comprehensive income are attributed to the owners of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control described above. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

# 2. ACCOUNTING POLICIES (Continued)

# 2.2 CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES (Continued)

The nature and the impact of the revised IFRSs are described below:

- (a) Amendments to IFRS 16 specify the requirements that a seller-lessee uses in measuring the lease liability arising in a sale and leaseback transaction to ensure the seller-lessee does not recognise any amount of the gain or loss that relates to the right of use it retains. Since the Group has no sale and leaseback transactions with variable lease payments that do not depend on an index or a rate occurring from the date of initial application of IFRS 16, the amendments did not have any impact on the financial position or performance of the Group.
- (b) The 2020 Amendments clarify the requirements for classifying liabilities as current or non-current, including what is meant by a right to defer settlement and that a right to defer must exist at the end of the reporting period. Classification of a liability is unaffected by the likelihood that the entity will exercise its right to defer settlement. The amendments also clarify that a liability can be settled in its own equity instruments, and that only if a conversion option in a convertible liability is itself accounted for as an equity instrument would the terms of a liability not impact its classification. The 2022 Amendments further clarify that, among covenants of a liability arising from a loan arrangement, only those with which an entity must comply on or before the reporting date affect the classification of that liability as current or non-current. Additional disclosures are required for non-current liabilities that are subject to the entity complying with future covenants within 12 months after the reporting period.

# 2.2 會計政策之變動及披露(續)

經修訂國際財務報告準則的性質及影響於 下文載述:

- (a) 國際財務報告準則第16號(修訂本)訂明賣方一承租人於計量售後租回交易產生的租賃負債時使用的規定,以確保賣方一承租人任不會確認與其所保留使用權有關的任何收益或虧損金額。由於本集團的財務報告準則第16號當日並無產生任何不取決於某一項指數或利率計算的可變租賃付款的售後租回交易,故該等修訂並無對本集團的財務狀況或表現造成任何影響。
- (b) 2020年修訂本澄清將負債分類為流 動或非流動的規定,包括遞延結算 權利的含義及於報告期末必須存在 的遞延權利。負債的分類不受實體 將行使其遞延結算權利的可能性所 影響。該等修訂亦澄清負債可以其 自身權益工具結算,以及僅在可轉 換負債的轉換選擇權自身作為權益 工具入賬的情況下,負債的條款才 不會影響其分類。2022年修訂本進 一步澄清在貸款安排產生的負債契 諾中,僅實體須於報告日期或之前 遵守的契諾方會影響該負債分類為 流動或非流動。非流動負債(實體 須於報告期後12個月內遵守未來契 諾)須作出額外披露。

# 2.2 CHANGES IN ACCOUNTING POLICIES AND 2.2 DISCLOSURES (Continued)

The Group has reassessed the terms and conditions of its liabilities as at 1 January 2023 and 2024 and concluded that the classification of its liabilities as current or non-current remained unchanged upon initial application of the amendments. Accordingly, the amendments did not have any impact on the financial position or performance of the Group.

(c) Amendments to IAS 7 and IFRS 7 clarify the characteristics of supplier finance arrangements and require additional disclosure of such arrangements. The disclosure requirements in the amendments are intended to assist users of financial statements in understanding the effects of supplier finance arrangements on an entity's liabilities, cash flows and exposure to liquidity risk. As a result of the implementation of the amendments, the Group has provided additional disclosures about its supplier finance arrangements in notes 27, 36 and 43 to the financial statements.

# 2.3 ISSUED BUT NOT YET EFFECTIVE INTERNATIONAL FINANCIAL REPORTING STANDARDS (Continued)

Further information about those IFRSs that are expected to be applicable to the Group is described below.

IFRS 18 replaces IAS 1 Presentation of Financial Statements. While a number of sections have been brought forward from IAS 1 with limited changes, IFRS 18 introduces new requirements for presentation within the statement of profit or loss, including specified totals and subtotals. Entities are required to classify all income and expenses within the statement of profit or loss into one of the five categories: operating, investing, financing, income taxes and discontinued operations and to present two new defined subtotals. It also requires disclosures about management-defined performance measures in a single note and introduces enhanced requirements on the grouping (aggregation and disaggregation) and the location of information in both the primary financial statements and the notes. Some requirements previously included in IAS 1 are moved to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors, which is renamed as IAS 8 Basis of Preparation of Financial Statements. As a consequence of the issuance of IFRS 18, limited, but widely applicable, amendments are made to IAS 7 Statement of Cash Flows, IAS 33 Earnings per Share and IAS 34 Interim Financial Reporting. In addition, there are minor consequential amendments to other IFRSs. IFRS 18 and the consequential amendments to other IFRSs are effective for annual periods beginning on or after 1 January 2027 with earlier application permitted. Retrospective application is required. The Group is currently analysing the new requirements and assessing the impact of IFRS 18 on the presentation and disclosure of the Group's financial statements.

# **2.3** 已頒佈但尚未生效的國際財務報告準 則(續)

預期將適用於本集團的該等國際財務報告 準則之進一步資料於下文載述。

國際財務報告準則第18號取代國際會計準 則第1號財務報表的呈列。儘管國際會計 準則第1號的多個部分已被繼承並作出有 限變動,但國際財務報告準則第18號對損 益表內的呈列方式引入新規定,包括指定 總計及小計。實體須將損益表內的所有收 入及開支分類為五個類別之一:經營、投 資、融資、所得税及已終止經營業務,並 呈列兩個新界定的小計。其亦規定在單一 附註中披露管理層界定的績效指標,並對 主要財務報表及附註中的組合(總計及分 類)及資訊位置提出更高的規定。之前包 含在國際會計準則第1號的部分規定已移 至國際會計準則第8號會計政策、會計估 計變動及錯誤,並重新命名為國際會計準 則第8號財務報表的編製基準。由於國際 財務報告準則第18號的頒佈,國際會計準 則第7號現金流量表、國際會計準則第33 號每股盈利及國際會計準則第34號中期財 務報告已作出有限但廣泛適用的修訂。此 外,其他國際財務報告準則亦有輕微相應 修訂。國際財務報告準則第18號及其他 國際財務報告準則之相應修訂於2027年1 月1日或之後開始之年度期間生效,並可 提早應用。本集團須追溯應用。本集團現 正分析新規定及評估國際財務報告準則第 18號對本集團財務報表的呈列及披露的影 響。

# 2.3 ISSUED BUT NOT YET EFFECTIVE INTERNATIONAL FINANCIAL REPORTING STANDARDS (Continued)

IFRS 19 allows eligible entities to elect to apply reduced disclosure requirements while still applying the recognition, measurement and presentation requirements in other IFRSs. To be eligible, at the end of the reporting period, an entity must be a subsidiary as defined in IFRS 10 Consolidated Financial Statements, cannot have public accountability and must have a parent (ultimate or intermediate) that prepares consolidated financial statements available for public use which comply with IFRSs. Earlier application is permitted. As the Company is a listed company, it is not eligible to elect to apply IFRS 19. Some of the Company's subsidiaries are considering the application of IFRS 19 in their specified financial statements.

Amendments to IFRS 9 and IFRS 7 clarify the date on which a financial asset or financial liability is derecognised and introduce an accounting policy option to derecognise a financial liability that is settled through an electronic payment system before the settlement date if specified criteria are met. The amendments clarify how to assess the contractual cash flow characteristics of financial assets with environmental, social and governance and other similar contingent features. Moreover, the amendments clarify the requirements for classifying financial assets with non-recourse features and contractually linked instruments. The amendments also include additional disclosures for investments in equity instruments designated at fair value through other comprehensive income and financial instruments with contingent features. The amendments shall be applied retrospectively with an adjustment to opening retained profits (or other component of equity) at the initial application date. Prior periods are not required to be restated and can only be restated without the use of hindsight. Earlier application of either all the amendments at the same time or only the amendments

related to the classification of financial assets is permitted. The amendments are not expected to have any significant impact on the Group's financial statements.

Amendments to IFRS 9 and IFRS 7 Contracts Referencing Nature-dependent Electricity clarify the application of the "own-use" requirements for in-scope contracts and amend the designation requirements for a hedged item in a cash flow hedging relationship for in-scope contracts. The amendments also include additional disclosures that enable users of financial statements to understand the effects these contracts have on an entity's financial performance and future cash flows. The amendments relating to the own-use exception shall be applied retrospectively. Prior periods are not required to be restated and can only be restated without the use of hindsight. The amendments relating to the hedge accounting shall be applied prospectively to new hedging relationships designated on or after the date of initial application. Earlier application is permitted. The amendments to IFRS 9 and IFRS 7 shall be applied at the same time. The amendments are not expected to have any significant impact on the Group's financial statements.

Amendments to IFRS 10 and IAS 28 address an inconsistency between the requirements in IFRS 10 and in IAS 28 in dealing with the sale or contribution of assets between an investor and its associate or joint venture. The amendments require a full recognition of a gain or loss resulting from a downstream transaction when the sale or contribution of assets constitutes a business. For a transaction involving assets that do not constitute a business, a gain or loss resulting from the transaction is recognised in the investor's profit or loss only to the extent of the unrelated investor's interest in that associate or joint venture. The amendments are to be applied prospectively. The previous mandatory effective date of amendments to IFRS 10 and IAS 28 was removed by the IASB. However, the amendments are available for adoption now.

Amendments to IAS 21 specify how an entity shall assess whether a currency is exchangeable into another currency and how it shall estimate a spot exchange rate at a measurement date when exchangeability is lacking. The amendments require disclosures of information that enable users of financial statements to understand the impact of a currency not being exchangeable. Earlier application is permitted. When applying the amendments, an entity cannot restate comparative information. IFRS 7 Financial Instruments: Disclosures: The amendments have updated certain wording in paragraph B38 of IFRS 7 and paragraphs IG1, IG14 and IG20B of the Guidance on implementing IFRS 7 for the purpose of simplification or achieving consistency with other paragraphs in the standard and/or with the concepts and terminology used in other standards. In addition, the amendments clarify that the Guidance on implementing IFRS 7 does not necessarily illustrate all the requirements in the referenced paragraphs of IFRS 7 nor does it create additional requirements. Earlier application is permitted. The amendments are not expected to have any significant impact on the Group's financial statements.

# 2.3 ISSUED BUT NOT YET EFFECTIVE INTERNATIONAL FINANCIAL REPORTING STANDARDS (Continued)

- IFRS 9 Financial Instruments: The amendments clarify that when a lessee has determined that a lease liability has been extinguished in accordance with IFRS 9, the lessee is required to apply paragraph 3.3.3 of IFRS 9 and recognise any resulting gain or loss in profit or loss. In addition, the amendments have updated certain wording in paragraph 5.1.3 of IFRS 9 and Appendix A of IFRS 9 to remove potential confusion. Earlier application is permitted. The amendments are not expected to have any significant impact on the Group's financial statements.
- IFRS 10 Consolidated Financial Statements: The amendments clarify that the relationship described in paragraph B74 of IFRS 10 is just one example of various relationships that might exist between the investor and other parties acting as de facto agents of the investor, which removes the inconsistency with the requirement in paragraph B73 of IFRS 10. Earlier application is permitted. The amendments are not expected to have any significant impact on the Group's financial statements.
- IAS 7 Statement of Cash Flows: The amendments replace the term "cost method" with "at cost" in paragraph 37 of IAS 7 following the prior deletion of the definition of "cost method". Earlier application is permitted. The amendments are not expected to have any impact on the Group's financial statements.

#### 2.4 MATERIAL ACCOUNTING POLICIES

#### **Investments in associates**

An associate is an entity in which the Group has a long term interest of generally not less than 20% of the equity voting rights and over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

The Group's investments in associates are stated in the consolidated statement of financial position at the Group's share of net assets under the equity method of accounting, less any impairment losses.

The Group's share of the post-acquisition results and other comprehensive income of associates is included in the consolidated statement of profit or loss and other comprehensive income, respectively. In addition, when there has been a change recognised directly in the equity of the associate, the Group recognises its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and its associates are eliminated to the extent of the Group's investments in the associates, except where unrealised losses provide evidence of an impairment of the assets transferred. Goodwill arising from the acquisition of associates is included as part of the Group's investments in associates.

#### **2.4 MATERIAL ACCOUNTING POLICIES** (Continued)

#### **Investments in associates** (Continued)

If an investment in associates becomes an investment in a joint venture or vice versa, the retained interest is not remeasured. Instead, the investment continues to be accounted for under the equity method. In all other cases, upon loss of significant influence over the associate, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

When an investment in an associate is classified as held for sale, it is accounted for in accordance with IFRS 5 Non-current Assets Held for Sale and Discontinued Operations.

#### **Business combinations and goodwill**

Business combinations are accounted for using the acquisition method. The consideration transferred is measured at the acquisition date fair value which is the sum of the acquisition date fair values of assets transferred by the Group, liabilities assumed by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. For each business combination, the Group elects whether to measure the non-controlling interests in the acquiree at fair value or at the proportionate share of the acquiree's identifiable net assets. All other components of non-controlling interests are measured at fair value. Acquisition-related costs are expensed as incurred.

## **2.4 MATERIAL ACCOUNTING POLICIES** (Continued)

#### **Business combinations and goodwill** (Continued)

The Group determines that it has acquired a business when the acquired set of activities and assets includes an input and a substantive process that together significantly contribute to the ability to create outputs.

When the Group acquires a business, it assesses the financial assets and liabilities assumed for appropriate classification and designation in accordance with the contractual terms, economic circumstances and pertinent conditions as at the acquisition date. This includes the separation of embedded derivatives in host contracts of the acquiree.

If the business combination is achieved in stages, the previously held equity interest is remeasured at its acquisition date fair value and any resulting gain or loss is recognised in profit or loss or other comprehensive income, as appropriate.

Any contingent consideration to be transferred by the acquirer is recognised at fair value at the acquisition date. Contingent consideration classified as an asset or liability is measured at fair value with changes in fair value recognised in profit or loss. Contingent consideration that is classified as equity is not remeasured and subsequent settlement is accounted for within equity.

Goodwill is initially measured at cost, being the excess of the aggregate of the consideration transferred, the amount recognised for non-controlling interests and any fair value of the Group's previously held equity interests in the acquiree over the identifiable assets acquired and liabilities assumed. If the sum of this consideration and other items is lower than the fair value of the net assets acquired, the difference is, after reassessment, recognised in profit or loss as a gain on bargain purchase.

## **2.4.** MATERIAL ACCOUNTING POLICIES (Continued)

#### **Business combinations and goodwill (**Continued)

After initial recognition, goodwill is measured at cost less any accumulated impairment losses. Goodwill is tested for impairment annually or more frequently if events or changes in circumstances indicate that the carrying value may be impaired. The Group performs its annual impairment test of goodwill as at 31 December. For the purpose of impairment testing, goodwill acquired in a business combination is, from the acquisition date, allocated to each of the Group's cash-generating unit (the "CGU"), or groups of cash-generating units (the "CGU groups"), that are expected to benefit from the synergies of the combination, irrespective of whether other assets or liabilities of the Group are assigned to those units or groups of units.

Impairment is determined by assessing the recoverable amount of the CGU (or CGU groups) to which the goodwill relates. Where the recoverable amount of the CGU is less than the carrying amount, an impairment loss is recognised. An impairment loss recognised for goodwill is not reversed in a subsequent period.

Where goodwill has been allocated to a CGU (or a CGU group) and part of the operation within that unit is disposed of, the goodwill associated with the operation disposed of is included in the carrying amount of the operation when determining the gain or loss on the disposal. Goodwill disposed of in these circumstances is measured based on the relative value of the operation disposed of and the portion of the CGU retained.

#### Fair value measurement

The Group measures its debt investments, contingent consideration and equity investments at fair value at the end of each reporting period. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

#### Fair value measurement (Continued)

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 based on quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 based on valuation techniques for which the lowest level input that is significant to the fair value measurement is observable, either directly or indirectly
- Level 3 based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

#### Impairment of non-financial assets

Where an indication of impairment exists, or when annual impairment testing for an asset is required (other than inventories, contract assets, deferred tax assets, financial assets and investment properties), the asset's recoverable amount is estimated. An asset's recoverable amount is the higher of the asset's or the CGU's value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the CGU to which the asset belongs. In testing a CGU for impairment, a portion of the carrying amount of a corporate asset (e.g., a headquarters building) is allocated to an individual CGU if it can be allocated on a reasonable and consistent basis or, otherwise, to the smallest group of cash-generating units.

An impairment loss is recognised only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to profit or loss in the period in which it arises in those expense categories consistent with the function of the impaired asset.

#### **Impairment of non-financial assets** (Continued)

An assessment is made at the end of each reporting period as to whether there is an indication that previously recognised impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognised impairment loss of an asset other than goodwill is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, but not to an amount higher than the carrying amount that would have been determined (net of any depreciation/amortisation) had no impairment loss been recognised for the asset in prior years. A reversal of such an impairment loss is credited to profit or loss in the period in which it arises.

#### Property, plant and equipment and depreciation

Property, plant and equipment, other than construction in progress, are stated at cost less accumulated depreciation and any impairment losses. When an item of property, plant and equipment is classified as held for sale or when it is part of a disposal group classified as held for sale, it is not depreciated and is accounted for in accordance with IFRS 5 Non-current Assets Held for sale and Discontinued Operations. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to profit or loss in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalised in the carrying amount of the asset as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, the Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly.

Depreciation for landfills is calculated by the units-of-production method to write off the cost of each item of landfills to its residual value over its estimated useful life. The estimated landfill volumes are as follows:

Rigid landfills 50,000 tons/each Flexible landfill 500,000 tons/each

# Property, plant and equipment and depreciation (Continued)

Except for landfills, depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life. The estimated useful lives of property, plant and equipment are as follows:

Owned properties 14 to 30 years

Motor vehicles 5 years

Fixtures and equipment 2 to 20 years

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately. Residual values, useful lives and the depreciation method are reviewed, and adjusted if appropriate, at least at each financial year end, with the effect of any changes in estimate accounted for on a prospective basis.

When the Group makes payments for ownership interests of properties which includes both leasehold lands and building elements, the entire consideration is allocated between the leasehold lands and the building elements in proportion to the relative fair values at initial recognition. To the extent the allocation of the relevant payments can be made reliably, interest in leasehold lands is presented as "property, plant and equipment" in the consolidated statement of financial position. When the consideration cannot be allocated reliably between non-lease building element and undivided interest in the underlying leasehold lands, the entire properties are classified as property, plant and equipment.

An item of property, plant and equipment including any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognised in the statement of profit or loss in the year the asset is derecognised is the difference between the net sales proceeds and the carrying amount of the relevant asset.

Construction in progress is stated at cost less any impairment losses, and is not depreciated. It is reclassified to the appropriate category of property, plant and equipment when completed and ready for use.

### **Investment properties**

Investment properties are interests in land and buildings (including right-of-use assets) held to earn rental income and/or for capital appreciation. Such properties are measured initially at cost, including transaction costs. Subsequent to initial recognition, investment properties are measured at cost less accumulated depreciation and any impairment losses.

The investment properties are depreciated on a straight-line basis at the rate of 3.17% per annum with the estimated residual value of 5% of the cost.

Any gains or losses on the retirement or disposal of an investment property are recognised in the statement of profit or loss in the year of the retirement or disposal.

#### Intangible assets (other than goodwill)

Intangible assets with finite useful lives, other than service concession arrangements as set out in "Service concession arrangements" below, that are acquired separately are carried at cost less accumulated amortisation and any impairment losses. Amortisation is recognised on a straight-line basis over their estimated useful lives.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss in the period when the asset is derecognised.

When the Group has a right to charge for usage of service concession infrastructure (as a consideration for providing construction services in a service concession arrangement), it recognises an intangible asset at fair value upon initial recognition. The Group's intangible assets represent operating concessions and are stated at cost less accumulated amortisation and any impairment losses, if any. Operating concessions are amortised over the tenure of the service concession arrangements and after taking into account of their estimated residual value, using straight-line method. The residual value is estimated by the Directors for the amount that could be recovered when the relevant contractual party is obliged to pay the Group for the transfer of infrastructure (which is built by the Group for obtaining the operating concession) at a price appraised by valuer upon the expiry of the service concession arrangements (if not extendable by the relevant contractual party) in accordance with the relevant service concession agreements. The estimated useful life, residual value and amortisation method are reviewed at the end of the reporting period, with the effect of any changes in estimate being accounted for on a prospective basis. Further details of operating concessions are set out in "Service concession arrangements" below.

# Consideration given to the Grantor

During construction stage, a contract asset is recognised to the extent that the Group has a future unconditional right to receive cash or another financial asset from the Grantors for the consideration paid and payable by the Group to the Grantors upon completion of the construction of the relevant infrastructure, that is a condition for granting such unconditional right. The contract asset is transferred to financial asset (receivable under a service concession arrangement) when the construction of the relevant infrastructure is completed. The Group has unconditional right to receive cash if the Grantors contractually guarantee to pay the Group specified or determinable amounts or the shortfall (the "Guarantee"), if any, between amounts received from the users of the service and specified or determinable amounts.

The financial assets (receivables under service concession arrangements) are accounted for in accordance with the policy set out for financial assets at amortised cost below. An intangible asset (operating concession) is recognised to the extent that the Group receives a right to charge users of the service, which is not an unconditional right to receive cash because the amounts are contingent on the extent that the use, and is accounted for in accordance with the policy set out for "Intangible assets" above.

If the Group is paid for the consideration partly by a financial asset and partly by an intangible asset, then each component of the consideration is accounted for separately and is recognised initially at the fair value of the consideration.

#### Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

#### Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

#### (a) Right-of-use assets

Right-of-use assets are recognised at the commencement date of the lease (that is the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and any impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease terms and the estimated useful lives of the assets as follows:

Leasehold lands 50 years Leased properties 1 to 20 years

If ownership of the leased asset transfers to the Group by the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

#### (b) Lease liabilities

Lease liabilities are recognised at the commencement date of the lease at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for termination of a lease, if the lease term reflects the Group exercising the option to terminate the lease. The variable lease payments that do not depend on an index or a rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in lease payments (e.g., a change to future lease payments resulting from a change in an index or rate) or a change in assessment of an option to purchase the underlying asset.

(c) Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of leased machinery and equipment (that is those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the recognition exemption for leases of low-value assets to leases of machinery and equipment that are considered to be of low value.

Lease payments on short-term leases and leases of low-value assets are recognised as an expense on a straight-line basis over the lease term.

# Group as a lessor

When the Group acts as a lessor, it classifies at lease inception (or when there is a lease modification) each of its leases as either an operating lease or a finance lease.

Leases in which the Group does not transfer substantially all the risks and rewards incidental to ownership of an asset are classified as operating leases. Rental income is accounted for on a straight-line basis over the lease term and is included in revenue in the statement of profit or loss due to its operating nature. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income. Contingent rents are recognised as revenue in the period in which they are earned.

Leases that transfer substantially all the risks and rewards incidental to ownership of an underlying asset to the lessee are accounted for as finance leases.

#### Investments and other financial assets

#### Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income, and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient of not adjusting the effect of a significant financing component, the Group initially measures a financial asset at its fair value plus in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under IFRS 15 in accordance with the policies set out for "Revenue recognition" below.

In order for a financial asset to be classified and measured at amortised cost or fair value through other comprehensive income, it needs to give rise to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

#### **2.4.** MATERIAL ACCOUNTING POLICIES (Continued)

#### **Investments and other financial assets** (Continued)

#### Initial recognition and measurement (Continued)

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows, while financial assets classified and measured at fair value through other comprehensive income are held within a business model with the objective of both holding to collect contractual cash flows and selling. Financial assets which are not held within the aforementioned business models are classified and measured at fair value through profit or loss.

Purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace are recognised on the trade date, that is, the date that the Group commits to purchase or sell the asset.

#### Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at amortised cost (debt instruments)

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

Financial assets at fair value through other comprehensive income (debt instruments)

For debt investments at fair value through other comprehensive income, interest income, foreign exchange revaluation and impairment losses or reversals are recognised in the statement of profit or loss and computed in the same manner as for financial assets measured at amortised cost. The remaining fair value changes are recognised in other comprehensive income. Upon derecognition, the cumulative fair value change recognised in other comprehensive income is recycled to profit or loss.

Financial assets designated at fair value through other comprehensive income (equity investments)

Upon initial recognition, the Group can elect to classify irrevocably its equity investments as equity investments designated at fair value through other comprehensive income when they meet the definition of equity under IAS 32 *Financial Instruments: Presentation* and are not held for trading. The classification is determined on an instrument-by-instrument basis.

Gains and losses on these financial assets are never recycled to the statement of profit or loss. Dividends are recognised as other income in the statement of profit or loss when the right of payment has been established, except when the Group benefits from such proceeds as a recovery of part of the cost of the financial asset, in which case, such gains are recorded in other comprehensive income. Equity investments designated at fair value through other comprehensive income are not subject to impairment assessment.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognised in profit or loss.

This category includes equity investments which the Group had not irrevocably elected to classify at fair value through other comprehensive income. Dividends on the equity investments are also recognised as other income in the statement of profit or loss when the right of payment has been established.

A derivative embedded in a hybrid contract, with a financial liability or non-financial host, is separated from the host and accounted for as a separate derivative if the economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at fair value through profit or loss. Embedded derivatives are measured at fair value with changes in fair value recognised in the statement of profit or loss. Reassessment occurs if there is a change in the terms of the contract that significantly modifies the cash flows.

#### **Derecognition of financial assets** (Continued)

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risk and rewards of ownership of the asset. When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

#### Impairment of financial assets

The Group performs impairment assessment under the expected credit loss ("ECL") model on financial assets, which are subject to impairment under IFRS 9 (including trade receivables, other receivables, amounts due from related parties, debt instruments at fair value through other comprehensive income, receivables under service concession arrangement, long-term receivables, cash and bank balances, and time deposits) and contract assets. The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition.

#### **2.4.** MATERIAL ACCOUNTING POLICIES (Continued)

#### **Impairment of financial assets** (Continued)

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of the relevant instrument. In contrast, 12-month ECL represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date. Assessment are done based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the reporting date as well as the forecast of future conditions.

#### Simplified approach

The Group always recognises lifetime ECL for trade receivables, contract assets and amounts due from related parties-trade portion without significant financing component. Under the simplified approach, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. Except for debtors including which is credit-impaired is assessed for impairment individually, the trade receivables, contract assets and amounts due from related parties-trade portion are grouped under a provision matrix into internal credit rating buckets based on shared credit risk characteristics by reference to repayment histories for recurring customers and current past due exposure for the new customers.

#### General approach

For all other instruments, the Group measures the loss allowance equal to 12 months ECL, unless when there has been a significant increase in credit risk since initial recognition, the Group recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

全期預期信貸虧損指相關工具的預期使用期內所有可能的違約事件產生的預期信貸虧損。相反,12個月預期信貸虧損指預期於報告日期後12個月內可能發生的違約事件導致的全期預期信貸虧損部分。評估乃根據本集團的歷史信貸虧損經驗進行,並根據債務人特有的因素、一般經濟狀況以及對報告日期當前狀況的評估以及對未來狀況的預測作出調整。

#### 簡化方法

本集團始終就沒有重大融資成分的貿易應收款項、合約資產及應收關連方款項的貿易部分確認全期預期信貸虧損。除包括已出現信貸減值的債務人個別地作減值評估外,貿易應收款項、合約資產及應收關連方款項的貿易部分乃參考還款歷史記錄(就經常客戶而言)及當期逾期風險(就新客戶而言),基於共有的信貸風險特性根據撥備矩陣進行內部信貸評估的分類以作集體評估。

# 一般方法

對於所有其他工具,本集團計量的虧損撥備等於12個月預期信貸虧損,除非自初步確認後信貸風險顯著增加,本集團確認全期預期信貸虧損。是否應確認全期預期信貸虧損的評估乃基於自初始確認以來發生違約的可能性或風險的顯著增加。

#### (a) Significant increase in credit risk

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether credit risk has increased significantly since initial recognition:

- an actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;
- significant deterioration in external market indicators of credit risk, e.g., a significant increase in the credit spread, or the length of time or the extent to which the fair value of a financial asset has been less than its amortised cost:
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;

具體而言,評估信貸風險自初步確 認以來有否大幅增加時,會考慮以 下資料:

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrates otherwise.

The Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

(b) Definition of default

The Group considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that receivables that meet either of the following criteria are generally not recoverable.

- when there is a breach of covenants by the counterparty; or
- information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full (without taking into account any collaterals held by the Group).

Irrespective of the above analysis, the Group considers that default has occurred when the contractual payment is more than 90 days past due unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

- 內部產生或獲取自外部來源 的資料表明,債務人不太可 能向債權人(包括本集團)全 額還款,不計及本集團持有 的任何抵押品。

(c) Credit-impaired financial assets

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- significant financial difficulty of the issuer or the borrower;
- a breach of contract, such as a default or past due event;
- the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider; or
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation.

## Write-off policy

The Group writes off a financial asset when there is information indicating that the counterparty is in severe financial difficulty and there is no realistic prospect of recovery, for example, when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures. Any recoveries made are recognised in profit or loss.

#### Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Estimation of ECL reflects an unbiased and probability-weighted amount that is determined with the respective risks of default occurring as the weights.

Generally, the ECL is the difference between all contractual cash flows that are due to the Group in accordance with the contract and the cash flows that the Group expects to receive, discounted at the effective interest rate determined at initial recognition.

To measure the ECL, contract assets, trade receivables and amounts due from related parties-trade portion are grouped based on shared common risk characteristics. The Group believes that most of the customers of trade receivable, contract assets and amounts due from related parties-trade portion are the same in nature, who are power plants, and treats all customers as one single group. The grouping is regularly reviewed by the Directors to ensure the constituents of the Group continue to share similar credit risk characteristics.

Except for investments in debt instruments that are measured at fair value through other comprehensive income, the Group recognises an impairment gain or loss in profit or loss for all financial instruments by adjusting their carrying amount, with the exception of trade receivables, contract assets, amounts due from related parties, receivables under service concession arrangement, long-term receivables and other receivables where the corresponding adjustment is recognised through a loss allowance account.

#### 預期信貸虧損的計量及確認

預期信貸虧損的計量為違約概率、違約損 失率及違約風險的函數。違約概率及違約 損失率乃基於根據前瞻性資料調整的歷史 數據評估。預期信貸虧損的預估乃無偏概 率加權平均金額,以發生違約的風險為權 重確定。

一般而言,預期信貸虧損為本集團根據合約應收的所有合約現金流量與本集團預計 收取的所有現金流量的差額,並按初步確認時釐定的實際利率貼現。

計量預期信貸虧損時,合約資產、貿易應收款項及應收關連方款項的貿易部分按共同風險特點分類。本集團相信貿易應收款項、合約資產及應收關連方款項的貿易部分的大部分客戶(發電廠)屬同一性質,將全部客戶視為同一類。董事定期檢討分組,確保集團成員公司繼續攤佔類似的信貸風險特點。

#### **Financial liabilities**

### Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as contingent consideration, loans and borrowings, payables.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade and bills payables, other payables, amounts due to related parties, interest-bearing bank and other borrowings.

The Group classifies financial liabilities that arise from a supplier finance arrangement within trade and bills payables in the statement of financial position if they have a similar nature and function to trade payables. This is the case if the supplier finance arrangement is part of the working capital used in the Group's normal operating cycle, the level of security provided is similar to trade payables and the terms of the liabilities that are part of the supply chain finance arrangement are not substantially different from the terms of trade payables that are not part of the arrangement. Cash flows related to liabilities arising from supplier finance arrangements that are classified in trade and bills payables in the statement of financial position are included in operating activities in the statement of cash flows. Otherwise, the financial liabilities are classified in interest-bearing bank and other borrowings in the statement of financial position and the related cash flows are included in financing activities in the statement of cash flows.

#### Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

Financial liabilities at amortised cost (trade and other payables, and borrowings)

After initial recognition, trade and other payables, and interest-bearing borrowings are subsequently measured at amortised cost, using the effective interest rate method unless the effect of discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in finance costs in the statement of profit or loss.

## **Derecognition of financial liabilities**

A financial liability is derecognised when the obligation under the liability is discharged or cancelled, or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and a recognition of a new liability, and the difference between the respective carrying amounts is recognised in the statement of profit or loss.

#### Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

#### **Treasury shares**

Own equity instruments which are reacquired and held by the Company or the Group (treasury shares) are recognised directly in equity at cost. No gain or loss is recognised in profit or loss on the purchase, sale, issue or cancellation of the Group's own equity instruments.

#### **Inventories**

Inventories mainly include supplies and spare parts in relation to the Group's environmental protection facility and operation and maintenance services, and are stated at the lower of cost and net realisable value. Cost of inventories is calculated using the first-in-first-out method. Net realisable value is based on estimated selling prices less any estimated costs to be incurred to completion and disposal.

## Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash on hand and at banks, and short-term highly liquid deposits with a maturity of generally within three months that are readily convertible into known amounts of cash, subject to an insignificant risk of changes in value and held for the purpose of meeting short-term cash commitments.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents comprise cash on hand and at banks, and short-term deposits as defined above, less bank overdrafts which are repayable on demand and form an integral part of the Group's cash management.

#### **Provisions**

A provision is recognised when a present obligation (legal or constructive) has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

When the Group expects some or all of a provision to be reimbursed, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain. The expense relating to a provision is presented in the statement of profit or loss net of any reimbursement.

When the effect of discounting is material, the amount recognised for a provision is the present value at the end of the reporting period of the future expenditures expected to be required to settle the obligation. The increase in the discounted present value amount arising from the passage of time is included in finance costs in the statement of profit or loss.

#### **Income tax**

Income tax comprises current and deferred tax. Income tax relating to items recognised outside profit or loss is recognised outside profit or loss, either in other comprehensive income or directly in equity.

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period, taking into consideration interpretations and practices prevailing in the countries in which the Group operates.

Deferred tax assets are recognised for all deductible temporary differences, and the carryforward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carryforward of unused tax credits and unused tax losses can be utilised, except:

- when the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary differences; and
- in respect of deductible temporary differences associated with investments in subsidiaries and associates, deferred tax assets are only recognised to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at the end of each reporting period and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

#### Income tax (Continued)

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax assets and deferred tax liabilities are offset if and only if the Group has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

## **Government grants**

Government grants are recognised at their fair value where there is reasonable assurance that the grant will be received and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the costs, for which it is intended to compensate, are expensed.

Where the grant relates to an asset, the fair value is credited to a deferred income account and is released to the statement of profit or loss over the expected useful life of the relevant asset by equal annual instalments or deducted from the carrying amount of the asset and released to the statement of profit or loss by way of a reduced depreciation charge.

#### **Revenue recognition**

#### Revenue from contracts with customers

The Group recognises revenue when (or as) a performance obligation is satisfied, i.e. when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
- the Group's performance creates or enhances an asset that the customer controls as the Groups performs; or
- the Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct good or service.

#### Revenue from contracts with customers (Continued)

When the consideration in a contract includes a variable amount, the amount of consideration is estimated to which the Group will be entitled in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

When the contract contains a financing component which provides the customer with a significant benefit of financing the transfer of goods or services to the customer for more than one year, revenue is measured at the present value of the amount receivable, discounted using the discount rate that would be reflected in a separate financing transaction between the Group and the customer at contract inception. When the contract contains a financing component which provides the Group with a significant financial benefit for more than one year, revenue recognised under the contract includes the interest expense accreted on the contract liability under the effective interest method. For a contract where the period between the payment by the customer and the transfer of the promised goods or services is one year or less, the transaction price is not adjusted for the effects of a significant financing component, using the practical expedient in IFRS 15.

#### Construction services

Revenue from the provision of construction services is recognised over time, using an input method to measure progress towards complete satisfaction of the service, because the Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced. The input method recognises revenue based on the proportion of the actual costs incurred relative to the estimated total costs for satisfaction of the construction services.

Claims to customers are amounts that the Group seeks to collect from the customers as reimbursement of costs and margins for scope of works not included in the original construction contract. Claims are accounted for as variable consideration and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved. The Group uses the expected value method to estimate the amounts of claims because this method best predicts the amount of variable consideration to which the Group will be entitled.

# Contracts with multiple performance obligations (including allocation of transaction price)

For contracts that contain more than one performance obligations, including certain concession agreements that include "Build-Operate-Transfer" ("BOT") and "Build-Own-Operate" ("BOO") contracts, the Group allocates the transaction price to each performance obligation on a relative stand-alone selling price basis.

The stand-alone selling price of the distinct good or service underlying each performance obligation is determined at contract inception. It represents the price at which the Group would sell a promised good or service separately to a customer. If a stand-alone selling price is not directly observable, the Group estimates it using appropriate techniques such that the transaction price ultimately allocated to any performance obligation reflects the amount of consideration to which the Group expects to be entitled in exchange for transferring the promised goods or services to the customer.

#### Existence of significant financing component

In determining the transaction price, the Group adjusts the promised amount of consideration for the effects of the time value of money if the timing of payments agreed (either explicitly or implicitly) provides the customer or the Group with a significant benefit of financing the transfer of goods or services to the customer. In those circumstances, the contract contains a significant financing component. A significant financing component may exist regardless of whether the promise of financing is explicitly stated in the contract or implied by the payment terms agreed to by the parties to the contract.

各項履約責任相關的可區分貨品或服務的 獨立售價於訂立合約時釐定,乃指本集團 將向客戶獨立出售承諾貨品或服務的價 格。倘獨立售價無法直接觀察所得,則本 集團會採用適當技術對其作出估算,致令 最終分配至任何履約責任的交易價反映本 集團預期於向客戶轉交承諾貨品或服務時 有權收取的代價金額。

# **Existence of significant financing component** (Continued)

For contracts where the Group transferred the construction services before payments from customers in which the Group adjusts for the promised amount of consideration for significant financing components, the Group applies a discount rate that would be reflected in a separate financing transaction between the Group and the customer at contract inception. The Group recognises interest income during the period between the payment from customers and the transfer of the associated services.

For contracts where the period between payment and transfer of the associated goods or services is less than one year, the Group applies the practical expedient of not adjusting the transaction price for any significant financing component.

### Revenue from other sources

Interest income generated from service concession arrangement is recognised on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, when appropriate, to the net carrying amount of the receivable under service concession arrangement.

Contract liabilities are recognised as revenue when the Group performs under the contract (i.e., transfers control of the related goods or services to the customer).

#### **Share-based payments**

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in note 34.

The fair value determined at the grand date of the equity-settled share-based payments is expensed on a straight-line basis over the vesting period, based on the Group's estimate of equity instruments that will eventually vest, with a corresponding increase in equity. At the end of the reporting period, the Group revises its estimate of the number of equity instruments expected to vest.

The impact of the original estimates, if any, is recognised in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the share premium.

Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counterparty renders the service.

# 3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND 3. 重大會計判斷及估計(續) ESTIMATES (Continued)

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

The followings are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

#### **Progress of completion of performance obligations**

The Group's revenue from construction contracts is recognised over time based on the stage of completion of the contract, which is determined as the proportion of the costs incurred relative to the estimated total costs to complete the contract. The Directors estimate both of the profit margin and contract cost at the beginning for each contract, revise the estimation of both profit margin and contract cost through regular review when the Directors consider there are changes in the assumptions throughout the contract period. The actual outcome of the contract in terms of its total revenue and costs may be higher or lower than the estimates and this will affect the revenue and profit recognised.

In addition, the Group makes provision for expected loss on construction contracts based on the estimation of the outcome of the ongoing construction projects by the Directors' prior experience and industry averages for similar projects. The Group assesses periodically the expected return of construction contracts and if the expectation differs from the original estimate, such difference will impact the expected return in the period in which such estimate has been changed.

# Provision of ECL for trade receivables, contract assets and amounts due from related parties-trade portion

The management of the Group estimates the amount of lifetime ECL of trade receivables, contract assets and amounts due from related parties-trade portion based on provision matrix through grouping of various debtors that have similar loss patterns, after considering ageing, internal credit ratings of trade debtors, repayment history and/or past due status of respective trade receivables. Estimated loss rates are based on historical observed default rates over the expected life of the debtors and are adjusted for forward-looking information. In addition, trade receivables and contract assets that are credit-impaired are assessed for ECL individually. The loss allowance amount of the trade receivables, contract assets and amounts due from related parties-trade portion is measured as the difference between the asset's carrying amount and the present value of estimated future cash flows with the consideration of expected future credit losses. The provision of ECL is sensitive to changes in estimates. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of a customer's actual default in the future. The information about the ECL and the Group's trade receivables, contract assets and amounts due from related parties-trade portion are disclosed in notes 22, 24 and 40 respectively.

#### **Provision for customer claims**

The Directors estimate the results of relevant events based on the information available upon 31 December 2024 and recognise accrued expenses at a most probable amount. Actual results may be different depending on the future progress.

## 3. 重大會計判斷及估計(續)

## 貿易應收款項、合約資產及應收關連方款 項的貿易部分的預期信貸虧損撥備

本集團管理層經考慮貿易債務人的賬齡、 內部信貸評級、還款歷史及/或個別貿 易應收款項的逾期狀況後,將具有類似信 貸風險特點的債務人分組,根據撥備矩陣 估計貿易應收款項、合約資產及應收關連 方款項的貿易部分的全期預期信貸虧損金 額。估計虧損率乃根據過往可觀察的違約 率除以債務人的預期賬齡,並就前瞻性資 料作出調整。此外,已出現信貸減值的貿 易應收款項、合約資產及應收關連方款項 的貿易部分將個別評估預期信貸虧損。貿 易應收款項及合約資產的虧損撥備金額乃 以資產的賬面值與估計未來現金流量的現 值加上預期未來信貸虧損兩者之間的差額 計量。預期信貸虧損撥備對估計變動尤為 敏感。本集團過往的信貸虧損經驗及對經 濟狀況的預測亦未必反映客戶未來的實際 違約情況。有關預期信貸虧損及本集團貿 易應收款項、合約資產及應收關連方款項 的貿易部分的資料分別於附註22、24及 40披露。

#### 就客戶索償所作撥備

董事根據於2024年12月31日可得的資料來估計有關事件的結果,並按最可能的金額確認應計開支。視乎未來進度,實際結果或會有所不同。

# 3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND 3. 重大會計判斷及估計(續) ESTIMATES (Continued)

#### Impairment of goodwill

The Group determines whether goodwill is impaired at least on an annual basis. This requires an estimation of the value in use of the CGUs to which the goodwill is allocated. Estimating the value in use requires the Group to make an estimate of the expected future cash flows from the CGUs and also to choose a suitable discount rate in order to calculate the present value of those cash flows. The carrying amount of goodwill at 31 December 2024 was RMB6,567,000 (2023: RMB6,567,000).

## Leases - Estimating the incremental borrowing rate

The Group cannot readily determine the interest rate implicit in a lease, and therefore, it uses an incremental borrowing rate ("IBR") to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Group "would have to pay", which requires estimation when no observable rates are available (such as for subsidiaries that do not enter into financing transactions) or when it needs to be adjusted to reflect the terms and conditions of the lease (for example, when leases are not in the subsidiary's functional currency). The Group estimates the IBR using observable inputs (such as market interest rates) when available and is required to make certain entity-specific estimates (such as the subsidiary's stand-alone credit rating).

# 商譽減值

本集團至少於每個會計年度評估商譽是否出現減值。這要求對被分配商譽的現金產出單元之使用價值進行估計。估計使用價值時,本集團需要估計來自現金產出單元的未來現金流量,同時選擇恰當的折現率計算該等現金流量之現值。於2024年12月31日,商譽的賬面值為人民幣6,567,000元(2023年:人民幣6,567,000元)。

## 租賃一估計遞增借款利率

本集團無法輕易確定租賃中的內含利率, 因此,本集團使用遞增借款利率(「遞增借 款利率」)計量租賃負債。遞增借款利率為 本集團於類似經濟環境中為取得與使用權 資產價值相近的資產,而以類似抵押品於 類似期間借入所需資金應支付的利率。因 此,遞增借款利率反映了本集團「應支付」 的利率,當無可觀察的利率時(如就並無 訂立融資交易的附屬公司而言)或當須對 利率進行調整以反映租賃的條款及條件時 (如當租賃並非以附屬公司的功能貨幣訂 立時),則須作出利率估計。當可觀察輸 入數據可用時,本集團使用可觀察輸入數 據(如市場利率)估算遞增借款利率並須作 出若干實體特定的估計(如附屬公司的獨 立信用評級)。

# 3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND 3. 重大會計判斷及估計(續) ESTIMATES (Continued)

# Leases – Significant judgement in determining the lease term of contracts with renewal options

The Group has a lease contract that includes extension and termination options. The Group applies judgement in evaluating whether or not to exercise the option to renew or terminate the lease. That is, it considers all relevant factors that create an economic incentive for it to exercise either the renewal or termination. After the commencement date, the Group reassesses the lease term if there is a significant event or change in circumstances that is within its control and affects its ability to exercise or not to exercise the option to renew or to terminate the lease (e.g., construction of significant leasehold improvements or significant customisation to the leased asset).

In addition, the renewal options for leases of plant are not included as part of the lease term as these are not reasonably certain to be exercised.

# Impairment of non-financial assets (other than goodwill)

The Group assesses whether there are any indicators of impairment for all non-financial assets (including the right-of-use assets) at the end of each reporting period. Indefinite life intangible assets are tested for impairment annually and at other times when such an indicator exists. Other non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. An impairment exists when the carrying value of an asset or a CGU exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The calculation of the fair value less costs of disposal is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. When value in use calculations are undertaken, management must estimate the expected future cash flows from the asset or the CGU and choose a suitable discount rate in order to calculate the present value of those cash flows.

# 租賃 - 在釐定包含重續選擇權的合約的租賃條款時作出重大判斷

本集團有一項包含延長及終止選擇權的租賃合約。本集團在評估應否行使重續或終止租賃的選擇權時運用判斷,即會考慮所有引致其行使重續或終止選擇權的經濟誘因的有關因素。於開始日期後,倘出現東之制範圍內的重大事件或情況變化重視主行使或不行使重續或終止租赁物業裝修或租赁權的能力(如重大租賃物業裝修或租賃資產的重大客制化改動),則本集團重新評估租賃條款。

此外,由於廠房租賃的重續選擇權不可合 埋地確定已行使,因此不計入租賃條款的 一部分。

For the purposes of resources allocation and assessment of segment performance, the executive directors, being the chief operating decision maker ("CODM"), regularly review types of goods or services delivered or provided by focusing on different business models. CODM assesses the performance of the operating segments based on a measure of "reportable segment profit", i.e., "revenue less cost of sales". The Group does not allocate depreciations and amortisations other than those presented in cost of sales and services, impairment of other non-current assets, impairment losses on financial and contract assets. The Group also does not allocate other income and other gains, other expense and losses, selling and distribution expenses, administrative expenses, research and development expenses, finance costs and share of profits of associates to its segments, as the CODM does not use such information to allocate resources to or evaluate the performance of the operating segments.

No segment assets and liabilities are presented as the CODM does not regularly review segment assets and liabilities.

EPC services (Continued)

Accordingly, revenue from EPC services, which are generally under project-based development contracts, is recognised based on the progress towards complete satisfaction of a performance obligation which is determined as the proportion of the costs incurred for the works (i.e. subcontracting costs, material costs and direct staff costs incurred) performed to date relative to the estimated total costs to complete the satisfaction of these services and the margin of each project, to the extent that the amount can be measured reliably and its recovery is considered probable.

The Group's construction contracts include payment schedules which require stage payments over the construction period once certain specified milestones are reached. The Group requires certain customers to provide upfront payments range from 10% to 30% of total contract sum, when the Group receives a deposit before construction commences, this will give rise to contract liabilities at the start of a contract, until the revenue recognised on the specific contract exceeds the amount of the deposit.

About 5%-10% of the contract price is withheld by the customers and will be released upon completion of the warranty period (normally 1-2 years after the date of the completion of the construction). Retention receivables, prior to expiration of the warranty period, are classified as contract assets and are reclassified to trade receivables when the warranty period expires. The Directors have assessed the effects of the financing component is not significant at contract level and therefore revenue is not adjusted for the effects of time value of money.

#### O&M services

O&M services mainly include the provision of operation service and regular maintenance service for desulfurization and denitrification facilities and dust removal facilities owned by their customers. The O&M service is as a single performance obligation and the Group's work scope includes the full operation, testing and repairing, upgrading and maintenance of flue gas treatment system/facilities owned by these coal-fired power plants.

Pursuant to certain contracts of rendering related O&M services, the transaction price is the amount of consideration to which the Group expects to be entitled in exchange for transferring O&M services to customers. Additionally, the O&M services typically meet the criterion where customers simultaneously receive and consume the benefits of the Group's performance as the Group performs. Therefore, the Directors have satisfied that the performance obligation of rendering O&M services are satisfied over time and the revenue is recognised over the service period.

Investment projects

Investment projects mainly include the following two categories:

a) the concession operation

In a typical BOT and BOO project, the Group is responsible for the financing, investment, construction, and operation of the projects according to the concession contracts with their customers. After the completion of the constructions, the Group operates and maintains the project for a pre-defined period, which is typically 15 to 20 years, when they are entitled to collecting revenues generated from the projects during the terms of the contracts.

The Directors have assessed that BOT and BOO services comprise two separate performance obligations, the construction of the facilities and the operating and maintenance service upon the completion of the construction of facilities, equivalent to a combination of EPC service and O&M service. Revenue recognition for each performance obligation follows the comparable stand-alone services specified above in EPC and O&M.

#### 24. CONTRACT ASSETS

The Group has rights to considerations from customers for the provision of construction, operation and maintenance services. Contract assets arise when the Group has rights to considerations for completion of such services and not yet billed under the relevant contracts, and their rights are conditioned on factors other than passage of time. Any amount previously recognised as contract assets are transferred to trade receivables when the rights become unconditional. Remaining rights and performance obligations in a particular contract are accounted for and presented on a net basis, as either a contract asset or a contract liability.

The contract assets primarily relate to the Group's rights to considerations for work completed and not billed because the rights are conditioned on the Group's future performance. Usually, the contract assets are transferred to trade receivables when the rights become unconditional. The Group typically reclassifies contract assets to trade receivables on the date of issue of invoice or billing with the customers when such right of collections becomes unconditional other than the passage of time.

# **24. CONTRACT ASSETS** (Continued)

There is no significant changes in 2024 and the decrease in 2023 was the result of the increase in the completion of EPC services at the end of the year.

During the year ended 31 December 2024, RMB276,000 of impairment losses was reversed for expected credit losses on contract assets (2023: RMB850,000 of impairment losses was recognised). The Group's trading terms and credit policy with customers are disclosed in note 22 to the financial statements.

Movement in lifetime ECL that has been recognised for contract assets in accordance with the simplified approach set out in IFRS 9 is as follows:

#### 24. 合約資產(續)

2024年並無重大變動,而於2023年合約 資產減少,乃由於年末時完成的EPC服務 增加。

於截至2024年12月31日止年度,就合約 資產的預期信貸虧損撥回減值虧損人民幣 276,000元(2023年:確認減值虧損人民 幣850,000元)。本集團與客戶的貿易條款 及信貸政策在財務報表附註22披露。

已根據國際財務報告準則第9號所載的簡 易方法就合約資產確認的全期預期信貸虧 損變動如下:

		2024	2023
		2024年	2023年

(Reversal of impairment)/impairment of contract assets, net	減值淨額	(276)	850
At end of year	年末	4,001	4,277

An impairment analysis is performed at each reporting date using a provision matrix to measure expected credit losses. The provision rates for the measurement of the expected credit losses of the contract assets are based on those of the trade receivables as the contract assets and the trade receivables are from the same customer bases. The provision rates of contract assets are based on days past due of trade receivables for groupings of various customer segments with similar loss patterns. The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions.

於各報告日期採用撥備矩陣進行減值分析,以計量預期信貸虧損。計算合約資產預期信貸虧損的撥備率乃基於列作合約資產的貿易應收款項的撥備率,而貿易應收款項乃來自相同客戶群。合約資產的撥備率乃基於具有類似虧損模式的多個客戶分部組別的貿易應收款項逾期日數釐定。計算反映概率加權結果、貨幣時值及於報告日期可得的有關過往事件、當前狀況及未來經濟狀況預測的合理及可靠資料。

# 25. DEBT INSTRUMENTS AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME

The amounts represent notes receivable. The Directors recognised the notes receivable, with fixed rates and maturity date, as debt instruments at fair value through other comprehensive income, as they held these notes for the purpose of cash collection and discounting. The Directors assessed the expected credit loss risk of notes receivable as low, mainly because the notes were secured by the drawer's bank deposit and the default risk was low.

# **25.** 按公允價值計入其他全面收益的債務 工具

有關金額指應收票據。董事將有固定利率 及到期日的應收票據確認為按公允價值計 入其他全面收益的債務投資,原因為持有 該等票據的目的為收取現金及貼現。董事 確定應收票據的預期信貸虧損風險較低, 主要因為票據由出票人的銀行存款擔保, 違約風險較低。

The financial liabilities that are part of the Group's supplier finance arrangements included in interest-bearing bank and other borrowings are normally settled on 180-day terms.

The Group has established supplier finance arrangements that are offered to some of the Group's key suppliers in Mainland China. Participation in the arrangements is at the suppliers' own discretion. Suppliers that participate in the supplier finance arrangements will receive early payments or payments at the original due dates on invoices sent to the Group from the Group's external finance provider. If suppliers choose to receive early payments, the Group pay a fee to the finance provider. In order for the finance provider to pay the invoices, the goods must have been received or supplied and the invoices must have been approved by the Group. Payments to suppliers ahead of or at the invoice due date are processed by the finance provider and, in all cases, the Group settles the original invoice by paying the finance provider in line with the original invoice maturity date or at a later date as agreed with the finance provider. Payment terms with suppliers have not been renegotiated in conjunction with the arrangements. The Group provides no security to the finance provider.

#### **Deferred tax liabilities** (Continued)

Deferred tax assets have not been recognised in respect of the following items:

As at 31 December 2024, the Group has unused tax losses of RMB22,035,000 (2023: RMB22,265,000) that are available for offsetting against future profits for the consecutive five years and will expire in one to five years. Deferred tax assets have not been recognised in respect of these losses as they have arisen in subsidiaries that have been loss-making for some time and it is not considered probable that taxable profits will be available against which the tax losses can be utilised.

The Group is liable for withholding taxes on dividends distributed by those subsidiaries established in Mainland China in respect of earnings generated from 1 January 2008. The applicable rate is 10% for the Group.

As at 31 December 2024, the Group recognised the relevant deferred tax liabilities of RMB32,630,000 (2023: RMB29,000,000) on earnings anticipated to be remitted by certain subsidiaries in the foreseeable future. At the end of the reporting period, the aggregate amount of temporary differences associated with undistributed earnings of subsidiaries for which deferred tax liabilities have not been recognised was RMB1,892,446,000 (2023: RMB1,635,138,000).

#### 遞延税項負債(續)

遞延税項資產並無就下列項目確認:

於2024年12月31日,本集團有未動用税項虧損人民幣22,035,000元(2023年:人民幣22,265,000元),可用於抵銷連續五年的未來溢利並將於一至五年內到期。由於遞延稅項資產乃於已有一段時間錄得虧損的附屬公司產生,且不大可能會有應課稅溢利以使用稅項虧損作抵銷,因此並無就該等虧損確認遞延稅項資產。

本集團須就在中國大陸成立的附屬公司就 2008年1月1日以來產生的盈利所分派的 股息繳納預扣税。適用於本集團的稅率為 10%。

於2024年12月31日,本集團就預計若干附屬公司於可預見未來將匯出的盈利確認相關的遞延所得稅負債人民幣32,630,000元(2023年:人民幣29,000,000元)。於報告期末,並無確認遞延稅項負債的附屬公司未分配盈利相關的暫時差異總額為人民幣1,892,446,000元(2023年:人民幣1,635,138,000元)。

For non-trade balance, an impairment analysis is performed at each reporting date by considering expected credit losses, which are estimated by applying a loss rate approach with reference to the historical loss record of the Group. The loss rate is adjusted to reflect the current conditions and forecasts of future economic conditions, as appropriate. The loss rate applied as at 31 December 2024 was 3.48% (2023: 3.89%).

For trade balance, an impairment analysis is performed at each reporting date using a provision matrix to measure expected credit losses. The provision rates are based on days past due for groupings of various customer segments with similar loss patterns. The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions.

就非貿易結餘而言,於每個報告日期均透過考慮預期信貸虧損以進行減值分析,而預期信貸虧損乃應用參考本集團過往虧損記錄的虧損率方法作估計。虧損率乃經調整,以反映現時狀況及對未來經濟狀況的預測(如適用)。於2024年12月31日應用的虧損率為3.48%(2023年:3.89%)。

就貿易結餘而言,於各報告日期採 用撥備矩陣進行減值分析,以計量 預期信貸虧損。撥備率乃基於具有 類似虧損模式的多個客戶分部組別 的逾期日數釐定。該計算反映概率 加權結果、貨幣時值及於報告日別 可得的有關過往事件、當前狀況及 未來經濟狀況預測的合理及可靠資 料。

## 42. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS (Continued)

Management has assessed that the fair values of cash and cash equivalents, the current portion of pledged time deposits and bank balances, trade receivables, current portion of amounts due from related parties, current portion of receivables under service concession arrangement, financial assets included in prepayments, deposits and other receivables, trade and bills payables, financial liabilities included in other payables, deposits received and accrued expenses, current portion of amounts due to related parties and short-term interest-bearing bank and other borrowings approximate to their carrying amounts largely due to the short-term maturities of these instruments.

The Group's finance department headed by the finance manager is responsible for determining the policies and procedures for the fair value measurement of financial instruments. The corporate finance team reports directly to management. At each reporting date, the corporate finance team analyses the movements in the values of financial instruments and determines the major inputs applied in the valuation. The valuation is reviewed and approved by management. The valuation process and results are discussed with management twice a year for interim and annual financial reporting.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

## 42. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS (Continued)

The fair values of long-term receivables, the non-current portion of amounts due from related parties and receivable under service concession arrangement, interest-bearing bank and other borrowings, other unlisted investment designated at fair value through profit or loss have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. For these assets and liabilities for which fair values are disclosed, the fair value hierarchy is level 2.

The fair values of unlisted equity investments designated at fair value through other comprehensive income have been estimated using the most recent transaction price method with reference to the recent transactions at 31 December 2024.

長期應收款項、應收關連方款項及服務特許經營安排項下的應收款項的非即期部分、計息銀行及其他借款以及指定為按公允價值計入損益的其他非上市投資的公允價值,乃使用具類似條款、信貸風險及餘下還款期限的工具現時之利率將預計之稅來現金流量折現而計算。就該等披露公允價值的資產及負債而言,公允價值等級為第二級。

指定為按公允價值計入其他全面收益的非 上市股權投資的公允價值乃參考截至2024 年12月31日的最近交易,使用最近期交 易價格的方法作估計。

## 43. FINANCIAL RISK MANAGEMENT OBJECTIVES 43. 金融風險管理目標及政策 AND POLICIES

The Group's major financial instruments include equity and debt investments, trade receivables, other receivables, receivable under service concession arrangement, long-term receivables, amounts due from related parties, pledged time deposits and bank balances, cash and cash equivalents, trade and bills payables, other payables, amounts due to related parties, lease liabilities, contingent consideration, interest bearing bank and other borrowings and long-term payable. Details of the financial instruments are disclosed in respective notes. The risks associated with these financial instruments include market risk (interest rate risk, currency risk and other price risk), credit risk and liquidity risk. The policies on how to mitigate these risks are set out below. The Directors manage and monitor these exposures to ensure appropriate measures are implemented on a timely and effective manner.

### Interest rate risk

The Group is exposed to fair value interest rate risk in relation to fixed-rate bank and other borrowings. The Group is also exposed to cash flow interest rate risk in relation to variable-rate bank and other borrowings, pledged time deposits and bank balances. It is the Group's policy to keep its bank and other borrowings, pledged time deposits and bank balances at floating rate of interests so as to minimise the fair value interest rate risk. The Group's cash flow interest rate risk is mainly concentrated on the fluctuation of the Benchmark Lending Rate of the People's Bank of China.

The Group currently does not have an interest rate hedging policy. However, the Directors monitors interest rate exposure and will consider hedging significant interest rate exposure should the need arise.

### 利率風險

本集團就定息銀行及其他借款面臨公允價值利率風險。本集團亦就浮息銀行及其他借款、已抵押定期存款及銀行結餘面臨現金流量利率風險。本集團的政策為將其銀行及其他借款、已抵押定期存款及銀行結餘維持在浮息利率,以盡量降低公允價值利率風險。本集團的現金流量利率風險主要集中於中國人民銀行基準貸款利率波動。

本集團目前並無利率對沖政策。然而,董 事監控利率風險及在需要時將考慮對沖重 大利率風險。

31 December 2024 2024年12月31日

## 43. FINANCIAL RISK MANAGEMENT OBJECTIVES 43. AND POLICIES (Continued)

#### Interest rate risk (Continued)

The sensitivity analysis below has been determined based on the exposure to interest rates for cash and cash equivalents, pledged time deposits and bank balances and variable rate bank and other borrowings at the end of each reporting period and assumed that the amount of liabilities outstanding at the end of each reporting period was outstanding for the whole year. A 50 basis point increase or decrease is used when reporting interest rate risk internally to key management personnel and represents management's assessment of the reasonably possible change in interest rates.

If interest rates had been 50 basis points higher/lower and all other variables were held constant, the Group's post-tax profit for the year ended 31 December 2024 would have increased/decreased by RMB1,331,000 (2023: RMB918,000), respectively. This is mainly attributable to the Group's exposure to interest rates on its cash and cash equivalents and pledged time deposits and bank balances and partially offset by the impact from bank and other borrowings.

### **Currency risk**

The Group has bank balances, prepayments, other receivables, trade receivables and other payables which are denominated in foreign currencies, mainly HKD, USD and EUR, as at 31 December 2024 and 2023.

The sensitivity analysis below has been determined based on the exposure to foreign currency rates and includes only outstanding foreign currency denominated monetary items and adjusts their translation at the period end for a 5% change in foreign currency rates. A 5% increase or decrease is used when reporting foreign currency rate risk internally to key management personnel and represents the Directors' assessment of the reasonably possible change in foreign currency rates.

## 利率風險(續)

下文敏感度分析乃根據各報告期末的現金 及現金等價物、已抵押定期存款及銀行結 餘及浮息銀行及其他借款的利率風險釐 定,並假設於各報告期末尚未償還的負債 於整個年度尚未償還。向主要管理人員內 部匯報利率風險時,利用50個基數點的增 減,代表管理層對利率的合理可能變動作 出的評估。

金融風險管理目標及政策(續)

倘利率增/減50個基數點且所有其他可變因素維持不變,本集團截至2024年12月31日止年度的除稅後溢利將分別增加/減少人民幣1,331,000元(2023年:人民幣918,000元)。此乃主要由於本集團的現金及現金等價物及已抵押定期存款及銀行結餘面對利率風險,且部分被銀行借款的影響所抵銷。

#### 貨幣風險

於2024年及2023年12月31日,本集團擁有以外幣(主要為港元、美元及歐元)計值的銀行結餘、預付款項、其他應收款項、 貿易應收款項及其他應收款項。

以下敏感度分析乃根據面臨的外匯匯率而 釐定,且僅包括以外幣計值之尚未償還貨 幣項目並就外幣匯率變動5%調整期末換 算。向主要管理人員內部匯報外匯匯率風 險時,利用5%的增減,代表董事對外匯 匯率的合理可能變動作出的評估。

## 43. FINANCIAL RISK MANAGEMENT OBJECTIVES 43. 金融風險管理目標及政策(續) AND POLICIES (Continued)

#### Foreign currency sensitivity analysis

If RMB had been appreciated/depreciated 5% against the foreign currency and all other variables were held constant, the Group's profit before tax for the year ended 31 December 2024 would have decreased/increased by RMB8,947,000 (2023: RMB1,642,000). This is mainly attributable to the Group's exposure to the foreign currency bank balance as at 31 December 2024 and 2023.

#### 外幣敏感度分析

倘人民幣兑外幣升值/貶值5%且所有其他可變因素維持不變,本集團截至2024年12月31日止年度的除稅前溢利將減少/增加人民幣8,947,000元(2023年:人民幣1,642,000元)。此乃主要由於本集團面臨於2024年及2023年12月31日外幣銀行結餘的匯率風險。

### Credit risk and impairment assessment

Credit risk refers to the risk that the Group's counterparties default on their contractual obligations resulting in financial losses to the Group. The Group's credit risk exposures are primarily attributable to trade receivables, contract assets, pledged time deposits and bank balances, amounts due from related parties, other receivables, long-term receivables, receivables under service concession arrangement and debt instruments at fair value through other comprehensive income. The Group does not hold any collateral or other credit enhancements to cover its credit risks associated with its financial assets.

#### 信貸風險及減值評估

#### **Credit risk and impairment assessment** (Continued)

The Group performed impairment assessment for financial assets and other items under ECL model. Before accepting any new customer, the Group uses an internal credit scoring system to assess the potential customer's credit quality and defines credit limits by customer. Limits and scoring attributed to customers are reviewed twice a year. Other monitoring procedures are in place to ensure that follow-up action is taken to recover overdue debts. The Group only accepts bills issued or guaranteed by reputable PRC banks if trade receivables are settled by bills and therefore the management of the Group considers the credit risk arising from the endorsed or discounted bills is insignificant. In this regard, the Directors consider that the Group's credit risk is significantly reduced. The Group is concentrated on one single counterparty for the receivables under concession arrangement. The Group has concentration of credit risk as 34% (2023: 39%) of the total trade receivables was due from the Group's five largest customers. In order to minimise the credit risk, the management of the Group has delegated a team responsible for determination of credit limits and credit approvals. The Group performs impairment assessment under ECL model on these balances and the applicable loss rates are disclosed in notes 22, 23, 24, and 40. The credit risk of contract assets is assessed based on the provision matrix within lifetime ECL. For other receivables, the Directors make periodic individual assessment on the recoverability of other receivables based on historical settlement records, past experience, and also quantitative and qualitative information that is reasonable and supportive forward-looking information. Movements of ECL for the respective items were disclosed in the respective notes to the consolidated financial statements.

#### 信貸風險及減值評估(續)

本集團根據預期信貸虧損模式對金融資產 及其他項目進行減值評估。於接納任何新 客戶前,本集團利用內部信貸評分系統 評估潛在客戶之信貸質素及就個別客戶 制定信貸限額。本集團會每年兩次審閱給 予客戶之限額及評分。本集團亦設有其他 監察程序,確保採取跟進行動收回逾期債 項。倘貿易應收款項以票據結算,本集團 僅接納由信譽良好的中國國內銀行發行或 擔保的票據,因此本集團管理層認為已背 書或貼現票據所產生的信貸風險屬微不足 道。在此方面,董事認為本集團的信貸風 險大幅減少。在特許權安排下,本集團的 應收款項僅集中於單一對手方。由於本集 團的貿易應收款項總額的34%(2023年: 39%) 乃應收本集團的五大客戶,因此本 集團有信貸集中風險。為了將信貸風險減 至最低,本集團管理層已委派一個專責團 隊,負責釐定信貸限額及進行信貸審批。 本集團根據預期信貸虧損模式對該等結餘 進行減值評估,而適用的虧損率在附註 22、23、24及40披露。合約資產的信貸 風險乃根據全期預期信貸虧損內的撥備矩 陣作評估。至於其他應收款項,董事根據 歷史結算記錄、過往經驗以及合理的定量 及定性資料和具支持性的前瞻性資料,定 期對其他應收款項的可收回性作評估。有 關項目的預期信貸虧損變動在綜合財務報 表內的相關附註內披露。

#### **Credit risk and impairment assessment** (Continued)

Credit risk on pledged time deposits and bank balances is limited because the counterparties are reputable banks with high credit ratings assigned by local or international credit agencies. The Group assessed 12-month ECL for pledged time deposits and bank balances by reference to information relating to probability of default and loss given default of the respective credit rating grades published by external credit rating agencies. Based on the average loss rates, the 12-month ECL on pledged time deposits and bank balances is considered to be insignificant.

The Group's credit risk grading framework comprises the following categories:

### 信貸風險及減值評估(續)

由於已抵押定期存款及銀行結餘的對手方為獲地方或國際信貸機構給予高度信貸評級的銀行,因此該等存款及結餘的信貸風險有限。本集團參考有關違約可能性及虧損導致違反外部信貸評級機構公佈的有關信貸評級等級的資料,對已抵押定期存款及銀行結餘進行12個月預期信貸虧損率,有關已抵押定期存款及銀行結餘的12個月預期信貸虧損被認為不重大。

本集團的信貸風險評級框架包括以下類 別:

Internal credit rating 內部信貸評級	Description 描述	Basis for recognising ECL 確認預期信貸虧損的基礎
Low risk	The counterparty has a low risk of default	12-month ECL
低風險	對手方的逾期風險低	12個月預期信貸虧損

## 43. FINANCIAL RISK MANAGEMENT OBJECTIVES 43. AND POLICIES (Continued)

### **Credit risk and impairment assessment** (Continued)

There has been no change in the estimation technique or significant assumptions made throughout the year ended 31 December 2024

The Group writes off trade receivables and contract assets when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the debtor has been placed under liquidation or has entered into bankruptcy proceedings.

### Liquidity risk

Ultimate responsibility for liquidity risk management rests with the Directors, who have established an appropriate liquidity risk management framework for the *management* of the Group's short, medium and long-term funding and liquidity management requirements. The Group manages liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities, by continuously monitoring forecast and actual cash flows, and by matching the maturity profiles of financial assets and liabilities.

Due to the Group's supplier finance arrangements, the relevant trade payables are due to several counterparties rather than individual suppliers. This results in the Group being required to settle several significant amounts with several counterparties, rather than less significant amounts with a number of suppliers. However, the Group's payment terms for trade payables covered by the arrangements are either identical to the payment terms for other trade payables or extended to not more than 180 days. Management does not consider the supplier finance arrangements to result in excessive concentrations of liquidity risk given the payment terms are not significantly extended. Details of the arrangements are disclosed in note 27 to the financial statements

The following table details the Group's remaining contractual maturity for its non-derivative financial liabilities. The table has been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the Group can be required to pay. The tables include both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate curves at the end of the reporting period. The contractual maturity is based on the earliest date on which the Group may be required to pay.

The Group uses different measures including an adjusted net debt-to-equity ratio to monitor its capital. Net debt is calculated as Interest-bearing bank and other borrowings, as shown in the consolidated statement of financial position, less cash and bank deposits. Total capital is calculated as equity holders' funds (i.e., total equity attributable to owners of the parent), as shown in the consolidated statement of financial position. The Group has established supplier finance arrangements to manage its working capital, details of which are included in note 27 to the financial statements.

The adjusted net debt-to-equity ratios as at the end of the reporting periods were as follows:

#### 資本風險管理(續)

本集團使用不同計量指標(包括經調整淨債務對權益比率)來監控其資本。淨債務乃按綜合財務狀況表所示的計息銀行及其他借款減現金及銀行存款而計算。總資本乃計算為綜合財務狀況表所示的權益持有人資金(即母公司擁有人應佔總權益)。本集團已設立供應商融資安排以管理其營運資金,有關詳情載於財務報表附註27。

#### 44. TRANSFERS OF FINANCIAL ASSETS

As at 31 December 2024, unmatured notes receivables amounting to RMB94,345,000 (2023: RMB48,849,000) issued by certain listed banks were endorsed to suppliers and RMB7,898,000 (2023: nil) unmatured notes receivables issued by certain listed banks were discounted to banks. In the opinion of the Directors, the Group has transferred the significant risks and rewards relating to these notes receivables, and the Group's obligations to the corresponding counterparties were discharged in accordance with the commercial practice in PRC and the risk of default in payment of the endorsed and discounted notes receivables is low because all these are issued and quaranteed by the reputable PRC banks. As a result, the relevant assets and liabilities were derecognised on the consolidated financial statements. The maximum exposure to the Group that may result from the default of these endorsed and discounted notes receivables at the end of the reporting period is represented by their carrying amounts.

In addition, the following are the Group's notes receivables that were transferred to banks or suppliers by discounting or endorsing the notes receivables on a full recourse basis as at 31 December 2024. As the Group has not transferred substantially all the risks and rewards relating to these notes receivables, the full carrying amount of the notes receivables are continuously recognised and the cash received upon the discount and the effect of endorsement are recorded as a collateralised bank borrowing and trade payables (see note 27). These notes receivables are carried at fair value through other comprehensive income in the Group's consolidated statement of financial position as the overall business model is to hold to collect contractual cash flows and to sell.
